Delaware behält seine Gehörlosenschule innerhalb eines einzigen lokalen Schulbezirks, und kein öffentliches Dokument gibt an, was sie kostet

Heather Grizzle · September 5, 2026

Delaware keeps its only school for deaf children inside one local district. No public document says what that arrangement costs. NDEDI's Delaware file.

What the Delaware state file in the National Deaf Education Data Index found…

Delaware sollte der einfache Fall sein. Neunzehn Schulbezirke, zweiundzwanzig Charter-Träger, eine Schule für gehörlose Kinder, und ein Bundesstaat so klein, dass eine Familie in Selbyville an einem Nachmittag zur einzigen Gehörlosenschule des Staates fahren und wieder zurückkommen kann. Als ich die Delaware-Datei für den National Deaf Education Data Index im August erstellte, erwartete ich ein kurzes Profil. Der Aktenbefund ergab stattdessen die ungewöhnlichste Governance-Struktur der bisher acht untersuchten Bundesstaaten, ein Finanzierungsmodell, das kein veröffentlichtes Dokument beziffert, und eine laufende Bundesbeschwerde zu Bürgerrechten, deren zentrale Kennzahl niemand, einschließlich des Staates selbst, überprüfen kann.

Der Index ist ein Referenzprojekt für einundfünfzig Rechtsgebiete, das ausschließlich anhand von Primärquellen dokumentiert, wo gehörlose und schwerhörige Schüler unterrichtet werden, welche öffentlichen Mittel ihnen folgen und welches institutionelle Räderwerk die Bereitstellung regelt. Alle einundvierzig örtlichen Bildungsbehörden Delawares wurden geprüft, jede nachstehende Zahl lässt sich auf eine benannte öffentliche Quelle zurückführen, und wo die Aktenlage schwieg, vermerkt die Datei dies, statt die Lücke zu füllen. Diese Disziplin war in Delaware wichtiger als in jedem Staat zuvor.

Eine Staatsschule, die einem Bezirk gehört

The Delaware School for the Deaf in Newark is a public residential school with a statutory basis, state-funded staff positions, and accreditation from the Conference of Educational Administrators of Schools and Programs for the Deaf. It is also a school of the Christina School District, one of Delaware's nineteen local districts, and so is Statewide Programs for the Deaf, Hard of Hearing and Deaf-Blind, the umbrella that serves deaf children in the other forty agencies. Where Alabama runs its deaf school through a state agency and Connecticut buys places at a private one, Delaware keeps a public school and places the whole apparatus inside one local district.

Die einschlägige Vorschrift, 14 Del. C. § 1331, liest sich eher wie ein Stellenplan als wie eine Satzung. Sie legt Verhältniszahlen für Förderlehrkräfte, Dolmetscher-Tutoren, Alphabetisierungsspezialisten und Internatsbetreuer fest, erklärt sie alle zu staatlichen Planstellen und nennt Christina nirgends. Keine Bestimmung in Titel 14, die die Schule einem Bezirk zuordnet, konnte gefunden werden, sodass die Zuordnung offenbar auf Verwaltungspraxis statt auf ausdrücklichem Recht beruht. Das ist kein akademischer Punkt. Am 1. Januar 2023 nutzte die General Assembly eine Haushaltsschlussformulierung, um das Office of Statewide Autism Programs aus Christina heraus- und in das Department of Education zu überführen. Der Mechanismus zur Abtrennung eines landesweiten Programms vom Bezirk existiert, er wurde in den letzten vier Jahren angewandt, und die Programme für Gehörlose, Schwerhörige und Taubblinde sind die einzigen, die noch dort verblieben sind.

Geld, das durch drei Kanäle fließt und in keinem erscheint

Christina's own budget documents describe the school as one of three programmes for which the district is fiscal agent and state that they "are all partially state funded with the remainder coming from tuition billing." The state's share arrives through the ordinary unit count. In the certified 2025-26 count the school carries 105 students generating 40.38 units, every one of them in the complex special education unit and none in preschool, basic or intensive. The remainder arrives as bills. Delaware law lets a receiving district charge tuition for a nonresident pupil counted in the complex unit, and because every student at the school is a complex-unit student, every one of them is billable to the district or charter where the family lives. Those sending agencies pay from a local tuition tax that each board may levy without a referendum.

The consequence is that no state budget document isolates a dollar figure for the Delaware School for the Deaf. The Governor's FY2026 recommended budget itemises no district and no statewide programme. No per-pupil tuition rate is published, and no document states whether charters are billed on the same basis as districts or whether families pay anything for the residential programme. Capital is the one clean case: the State Auditor's records show roughly thirty-nine million dollars in state construction appropriations between 2007 and 2010. Operating cost is invisible.

I want to be precise about what that does and does not mean. A legislator, a parent, an advocate or an auditor asking what Delaware spends on deaf education cannot answer the question from published sources. That is not evidence of anything improper. It is evidence that the school's finances are structurally hidden by the design of the funding, which is a more durable problem than any particular funding level would be. One illustration: a court-ordered property reassessment in New Castle County forced Christina to reset its tuition tax rate from $0.8903 to $0.1981 per hundred dollars of assessed value, and that levy is the one from which tuition billing is paid. A county reassessment reaches, three steps removed, the local tax that helps fund the state's only school for deaf children.

Vierzig Träger, ein Name

Delaware has no listening and spoken language educational placement. There are no OPTION Schools members, no auditory-oral school, and no auditory-verbal track anywhere in the state; the only such service is clinical, inside the cochlear implant programme at Nemours Children's Health. Christina therefore holds both ends of the pathway. What it does not hold is the day-to-day instruction of mainstreamed deaf children. Its outreach arm describes itself as a provider of "technical assistance, coaching, and professional development," and its service list is addressed to district staff rather than to students, asking districts whether their assessment teams understand hearing loss and whether they have "the time and training" to evaluate their own deaf education staff.

That last question presumes districts have deaf education staff to evaluate. Of forty-one local education agencies, exactly one names the Delaware School for the Deaf, Statewide Programs, or Christina anywhere on its public website, and that one is Christina. Two agencies met the threshold for a coded programme: Christina, the operator, and Appoquinimink, the state's largest district, whose entire published hearing provision is one bullet in a related services list reading "itinerant services for the hard

of hearing, partially deaf (HHPD)." Fourteen agencies mention hearing only in passing. Twenty-four publish nothing at all. One, a Dover charter whose every web domain has failed, could not be read by any method. No Delaware agency outside Christina publishes the title of a teacher of the deaf, an educational interpreter or an educational audiologist. Publication is not the same as service, and the Index says so in every workbook. But a service designed to build district capacity is operating in a state where no district discloses any.

Die Zahl im Zentrum einer Bürgerrechtsbeschwerde, die niemand überprüfen kann

In December 2023 the ACLU of Delaware filed a complaint with the U.S. Department of Education's Office for Civil Rights alleging systemic discrimination against deaf and hard of hearing youth. Its headline claim was quantitative: nationally about nine per cent of deaf and hard of hearing children attend a school for the deaf, and in Delaware the figure is over forty. The director of Statewide Programs said she was "not sure where they got the 40% number." Members of the deaf community objected to the complaint as well, the ACLU filed a narrowed version in June 2024 with an apology, and no public outcome has been located.

Here is what the state's own record can contribute. The Department of Education's last child count broken out by disability category is for 2017-18. It recorded 201 students aged six to twenty-one in the hearing impairment category, of whom 113 spent most of the school day in a regular class and 56 were in a separate school, a share of 27.9 per cent. Nothing comparable has been published since. Current educational environment files disaggregate by age and by race and never by disability category, and the state's otherwise excellent open data portal carries a single binary disability flag. As of 2024-25 there is no published Delaware source from which anyone can determine where the state's deaf and hard of hearing students are educated.

The 27.9 per cent figure and the forty per cent figure are not the same measure, and the file does not pretend they are. The complaint appears to describe all deaf and hard of hearing children, including those under five, where the school's share would be much higher. But the point holds whichever number is closer to right. A state facing a federal complaint about placement rates stopped publishing placement rates by disability category several years before the complaint was filed. I found no evidence the two facts are connected, and the second is almost certainly a reporting simplification. The effect is identical either way: the central factual question in the dispute cannot be

resolved from Delaware's published data by the complainant, the respondent, or anyone else.

Was die Akte sonst noch korrigierte

Two smaller findings are worth carrying forward. Delaware was believed to have passed a LEAD-K style language milestones law between 2017 and 2019. It did not. The nearest instrument is the 2010 Deaf Children's Bill of Rights, which guarantees that no child is denied instruction in a communication mode solely because another is used, but creates no assessment tool and no advisory body. This is the third consecutive state in the series whose believed LEAD-K provision dissolved on inspection. And Delaware's educational interpreter standard is unusually strict, requiring an EIPA score of 4.0 with no provisional tier where many states accept 3.5, yet the state has no general interpreter licensure at all, and a 2022 bill to create one died in committee.

Was die Akte nicht klären konnte

Die Dollarkosten der Schule in irgendeinem Jahr. Der den entsendenden Trägern berechnete Schulgeldsatz. Ob Christina-Personal Schüler unterrichtet, die anderswo eingeschrieben sind, oder nur deren Lehrkräfte berät. Das Instrument, falls vorhanden, das die Schule Christina zuordnet. Aktuelle Platzierungsdaten nach Behinderungskategorie. Der Bericht der Deaf Education Task Force von 2014, die letzte staatliche Untersuchung zu diesem Thema, der online nicht gefunden werden konnte. Jedes dieser Elemente wird als Lücke vermerkt statt gefüllt, und mehrere ließen sich durch eine Akteneinsicht schließen.

Delaware ist der achte Staat im Index und der achte, der zeigt, dass es keine landesweite Norm dafür gibt, wie ein Staat gehörlose Kinder unterrichtet. Was er hinzufügt, ist eine spezifische Lektion über Sichtbarkeit. Eine Schule kann öffentlich, gesetzlich verankert, akkreditiert und stabil in der Einschreibung sein und dennoch in einem Haushalt oder in einem Platzierungsdatensatz unauffindbar bleiben. Der Index existiert, um diese Art von Abwesenheit, Staat für Staat, lesbar zu machen.
