New York Never Said Who Can Interpret

Heather Grizzle · October 12, 2026

New York définit les services d'interprétation éducative mais ne fixe aucun critère de qualification ou de score pour les interprètes. Le dossier de New York de NDEDI met en évidence cette lacune.

Sommaire

1. La définition qui s'arrête
2. Ce qu'une offre d'emploi accepte lorsque l'État ne fixe rien
3. Comment les autres États fixent un seuil minimal
4. Ce que le dossier peut et ne peut pas dire
5. Ce qui comblerait l'écart
6. Sources

New York's regulations define what an educational interpreter does and never say who may do it. A Capital Region BOCES posting shows what fills that silence.

EN BREF

- New York's special education regulation, 8 NYCRR 200.1(nnn), defines interpreting services by type and sets no credential, assessment score or registry for the person providing them.
- Une offre d'emploi active de Capital Region BOCES pour un interprète en milieu scolaire accepte un diplôme d'études secondaires, quatre ans d'expérience et un seul cours universitaire d'ASL. Elle ne mentionne aucune certification.
- Le Nebraska, le Michigan, le Maryland, le Massachusetts et le Maine inscrivent chacun un seuil minimal pour les interprètes dans leur loi ou leur réglementation. L'État de New York, avec 3 644 élèves identifiés comme sourds ou malentendants, n'en inscrit aucun.
- L'État ne publie pas non plus de décompte des interprètes travaillant dans ses écoles, de sorte qu'aucune partie extérieure ne peut mesurer cet écart.

New York regulates what an educational interpreter does and says nothing about who may do it. Section 200.1(nnn) of the Commissioner's regulations defines interpreting services as oral transliteration, cued language transliteration, sign language transliteration and interpreting, transcription services such as CART, C-Print and TypeWell, and special interpreting services for students who are deaf-blind. The definition ends there. It names no credential, no assessment score, no registry and no minimum level of skill, and the National Deaf Education Data Index found no Department guidance that supplies one.

La définition qui s'arrête

The Index's New York state file, version 2.0, audited all 746 education agencies in the state: 685 operating districts, New York City as one unit, 37 BOCES, the eleven state-supported and chapter 1060 schools, the two state-operated schools and four state agencies. Its workforce block asks three questions of every state: what qualification the state requires of a K-12 educational interpreter, how many interpreters work in its schools, and where they are trained. New York answers none of them on the public record. The qualification is recorded as not found, the interpreter workforce as not published, and the preparation programs as a re-run target.

The population this leaves unprotected is not small. The State Education Department's count as of 2 October 2024 identifies 1,008 students under Deafness, 2,636 under Hearing Impairment and 28 under Deaf-Blindness. Not every one of those students uses an interpreter, and the count cannot say how many do. But every one who does is placed with an interpreter whose skill the state has never defined, and only 36 of the 746 agencies the Index read publish any interpreting service or interpreter at all.

Ce qu'une offre d'emploi accepte lorsque l'État ne fixe rien

Where the state is silent, each employer writes its own floor, and the floor can sit very low. Capital Region BOCES, read on 12 October 2026, is recruiting a full-time, ten-month Educational Interpreter. The posting accepts any one of three routes: a bachelor's degree in an interpreter education program or a closely related field; an associate's degree in the same plus two years of interpreting experience; or a high school diploma or GED, four years of experience interpreting for deaf and hard of hearing people, and one college-level course in American Sign Language. It lists no certification. It does not mention the Educational Interpreter Performance Assessment, the Registry of Interpreters for the Deaf, or the National Interpreter Certification. The one screening it requires is a fingerprint background check.

None of those three routes measures whether the person can interpret. A degree shows coursework, years show employment, and a single ASL course shows that a course was taken. A district that hires through the third route has met every published requirement in New York while placing in a classroom someone whose interpreting has never been assessed by anyone. This is not a criticism of Capital Region BOCES, which published more than most. The Index found four other BOCES describing their own interpreters (Dutchess, Hamilton-Fulton-Montgomery under Co-Ser 324, Orange-Ulster under Co-Ser 714, and Monroe 1 under the title K-12 Educational Interpreter), and none of them prints a required credential either. The pattern is the state's, not the employer's.

Comment les autres États fixent un seuil minimal

Each of the states below writes its interpreter floor into law or rule; New York writes none. The five other states were audited in earlier releases of the Index, and each file cites the rule from the state's own code.

Seuils minimaux pour les interprètes en milieu scolaire (K-12) dans six États de l'Index

État (fichier de l'Index)	Seuil minimal pour l'interprète en milieu scolaire (K-12)	Où il se situe
Nebraska (27)	EIPA 4.0 ; 3,5 pour les droits acquis, 3,0 à titre provisoire	Rule 51, 010.06
Michigan (22)	EIPA 4.0 depuis le 1er septembre 2016 ; 3,5 pour les remplaçants	R 393.5026 et 393.5027
Maryland (20)	Licence de spécialité éducative EIPA 4.0, instaurée en 2023 ; conformité repoussée au 1er juillet 2027	Loi de licence de 2023 ; Ch. 196 de 2026
Massachusetts (21)	Registre tenu par la Commission for the Deaf and Hard of Hearing, EIPA 3,5	Registre de la MCDHH, 120 inscrits en 2025-2026
Maine (19)	Licence d'interprète d'État exigée	32 MRSA ch. 22 ; MUSER
New York (32)	Aucun trouvé	8 NYCRR 200.1(nnn) définit uniquement le service

Source : fichiers d'État 19, 20, 21, 22, 27 et 32 du National Deaf Education Data Index

The comparison is not flattering to the others in every respect. Maryland's standard was enacted and then paused under pressure from school boards and superintendents, and Nebraska exempts K-12 interpreters from its commission's licensure while setting the EIPA floor in education rule. A floor on paper is not a floor in practice. But each of those states has written down a number that a parent, an advocate or an auditor can hold a district to. New York, with 3,644 students identified under Deafness or Hearing Impairment, has not.

Ce que le dossier peut et ne peut pas dire

L'Index consigne la qualification comme non trouvée dans les pages qu'il a examinées, et non comme une absence dans la loi, et cette distinction importe. Une norme pourrait se trouver dans une note de service du Department, un avis de terrain ou une clause contractuelle qui ne figure pas dans les documents publics. Si une telle norme existe, elle n'est pas publiée, et une exigence qu'un parent ne peut pas trouver est une exigence qu'un parent ne peut pas faire respecter. La voie de correction est ouverte au Department dans les mêmes conditions qu'à quiconque : une citation d'une règle ou d'un document d'orientation fixant un seuil modifierait la conclusion dans la prochaine version.

The gap is not new. A 2012 survey of state interpreter rules by the University of Northern Colorado recorded a call to New York City's Office of Sign Language Interpreting Services, which said the city had its own internal screening and that New York State had no standard. The city still runs that office, and it serves the largest single share of the population: 1,931 of the 3,644 identified students, or 53.0 percent, sit in the city. Whatever screening the city applies, it is the city's own, published nowhere the Index could read, and it does not reach the other 1,713 identified students who live in the rest of the state.

Le dossier ne peut pas non plus indiquer combien d'interprètes travaillent dans les écoles new-yorkaises. Le Département de l'éducation de l'État ne publie aucun tableau du personnel par titre de poste, et le fichier fédéral du personnel au titre de la Section 618 pour New York n'a pas été consulté lors de ce cycle. Il reste donc un État sans seuil publié et sans décompte publié, ce qui signifie qu'aucune partie extérieure ne peut déterminer combien d'élèves sont servis par des interprètes qui ne répondraient au seuil d'aucun autre État figurant dans le tableau ci-dessus.

Ce qui comblerait l'écart

The fix is one sentence of regulation and one table of data, and neither appears to need new legislation: Part 200 is the Commissioner's regulation, adopted by the Board of Regents, and the table would be a Department publication. The first is a qualification added to Part 200: a minimum score on a named assessment for any person providing sign language interpreting under 200.1(nnn), with a grandfather period and a provisional tier so that districts are not left without staff overnight. Nebraska and

Michigan have run tiered versions of that structure for years, and Maryland's pause shows what happens when the transition is not funded or phased: the standard is enacted and then deferred. The second is a count. The State Education Department already publishes students by disability and district through its SEDCAR files; a companion table of interpreters by district, with their credential level, would let anyone measure the distance between the students who need an interpreter and the interpreters who can serve them.

Until either exists, the burden falls on families. A parent of a deaf child in New York can ask the committee on special education, in writing, what assessment the assigned interpreter has passed and at what score, and can ask for the answer in the IEP. The district is not required by state rule to have an answer. That is the gap, stated as plainly as the file can state it: New York funds the service and defines the service, and on the public record it sets nothing about the person who delivers it. NDEDI's state release schedule is at ndedi.org.
